Printer Driver

How to Install

Notes:

- The instructions may vary depending on the Windows OS version.
- By installing this driver, the printer icon named "Brother [model name] Printer" or "Brother [model name] series" will be added in the **Devices and Printers** section.
- You must be logged on as an Administrator.
- If the **User Account Control** dialog box appears, click **Yes**.
- If the **Windows Security** dialog box appears, check **Always trust software from "Brother Industries, ltd."** and click **Install**.

For Network Shared Printing:

*If your client PC has the same OS as the server PC:

1. Open the **Control Panel**. (Click here to see how to open the Control Panel.)
2. Click **Hardware and Sound** => **Devices and Printers** => **Add a printer**.
3. Click **The printer that I want isn't listed**.
4. Select **Select a shared printer by name** and type the Network Printer's Name, e.g. \\server\[model name]
5. Click **Next**.
6. If the warning message appears, click **Install driver**.
7. Click **Next**.
8. If you want to use your Brother machine as the default printer, check **Set as the default printer**.
   Click **Print a test page** to check if your machine is working properly.
9. Click **Finish**.

*If your client PC has a different OS than the server PC:

NOTE: There are some instances where you should follow the steps above, even if the client PC uses a different OS than that of the server.

1. Once the download is complete, open the folder or directory and double click on the downloaded file to extract it.
   If you cannot find the downloaded file, please click here to see how to download a file.
2. Open the **Control Panel**. (Click here to see how to open the Control Panel.)
3. Click **Hardware and Sound** => **Devices and Printers** => **Add a printer**.
4. Click **The printer that I want isn't listed**.
5. Select **Select a shared printer by name** and type the Network Printer's Name, e.g. \\server\[model name]
6. Click **Next**.
7. If the **Connect to Printer** dialog box appears, click **OK**.
8. Click **Have Disk**.
9. Click **Browse** and specify the folder created in Step 1.
10. Click **Open**.
11. Click **OK**.
12. Click **Next**.
13. If you want to use your Brother machine as the default printer, check **Set as the default printer**.
    Click **Print a test page** to check if your machine is working properly.
14. Click **Finish**.

For Network Printing using TCP/IP (Peer-to-Peer Printing):

1. Once the download is complete, open the folder or directory and double click on the downloaded file to extract it.
   If you cannot find the downloaded file, please click here to see how to download a file.
2. Open the **Control Panel**. (Click here to see how to open the Control Panel.)
3. Click **Hardware and Sound** => **Devices and Printers** => **Add a printer**.
4. Click **The printer that I want isn't listed**.
5. Select **Add a printer using a TCP/IP address or hostname** and click **Next**.
6. Select **TCP/IP Device** from the Device type.
   Type the IP address of your Brother machine and be sure to check off the **Query the printer and automatically select the driver to use** option.
7. Click **Next**.
8. Click **Have Disk**.
9. Click **Browse** and specify the folder created in Step 1.
